DETAILED ACTION

1. This Office Action is in response to the Amendment filed on September 26, 2011, which paper has been placed of record in the file.
2. Claims **5 and 10-30** are pending in this application.

Allowable Subject Matter/Reasons for Allowance

3. Claims **5, 10, 12, and 28** are allowed over the prior arts cited records.

The closest prior arts are:

1) Kossovsky (US 2002/0004775) discloses an online patent and license exchange is provided which enables potential licensors and licensees of patents and other intellectual property rights to efficiently and reliably transact IP license or assignment agreements. Three markets are part of the exchange: a license market, an option market and a securitized asset Securitized Asset cash flows market. The online patent and license exchange includes a method of providing a valuation of an IP asset using data from companies in a similar technology classification as the IP asset, a method of generating a suggested IP asset asking price, an index of IP market value according to technology classification, a method for quantifying the financial risk of an asset, and a quantitative database of technology attributes of IP assets.

2) Kossovsky (US 60/124847) discloses an integrated mechanism for transferring rights between creators, originators, or inventors (collectively, inventors) and assignees of new technology (sellers) and other forms of intellectual property to commercial

enterprises (buyers). The invention uses the Internet as a global conduit to accelerate communications and information flow, to impart knowledge, and to creatively transfer and otherwise reduce risk for market participants. The invention reduces risk for all market participants by qualifying market members and by providing secure mechanisms to assure that only members participate; and it enables non-members to participate through members. The invention captures technical, utility, and marketing information on intellectual property from sellers and licensors and provides both active and passive mechanisms for imparting that knowledge to buyers and licensees. The invention provides a rapid, transparent and reasonable mechanism for pricing and assessing risk of intellectual property; an insurance mechanism for compensating the buyer in the event that a right is denied, withdrawn, or held in invalid; an auction mechanism for a seller to find a buyer willing to pay the market clearing price; and a mechanism for the seller and the buyer to negotiate the final terms of the agreement and to establish the mechanics for closing the transaction. Last, the invention provides an escrow service to facilitate the transaction and a continuing service to track and report payments called for in the agreement.

Therefore, it is clear from the description of Kossovsky's inventions that the cited prior arts do not consider the possibility of: presenting, by the computer system, one or more terms of said interest for the proposed transfer; permitting the network user, by the computer system to select one or more of the terms of said interest; and pooling, by the computer system, a plurality of bids by a plurality of the bidders for the transfer of said intellectual property asset; as included in claims 5 and 12; grouping, by the computer

system, a plurality said intellectual property assets for auction based on a relationship between said assets, permitting, by the computer system, the network user to select one or more terms of said interest; and, as included in claim 10; wherein said web server presents proposed transfer terms to the at least one prospective pooling seller based on interest of the at least one prospective pooling seller in the pooling request, said web server pools the set of related intellectual property assets in response to the at least one prospective pooling seller accepting the pooling request, as included in claim 28.

4. Claims (11, 15-21), (22-24), (13, 14, 25-27), and (29, 30), are allowed because they are dependent claims of the allowable independent claims 5, 10, 12, and 28 above, in that order.

Conclusion

5. Claims **5 and 10-30** are allowed.
